

At Kutch Copper Limited, we recognize our responsibility to manage waste in a manner that prioritizes environmental sustainability, health and safety. It aims to align with the principles of the circular economy, promoting the efficient use of resources, reducing waste generation and maximizing the value of materials through reuse, recycling and regeneration.

To achieve this, Kutch Copper shall strive to:

- Ensure compliance with all applicable environmental laws and regulations related to waste management.
- Adhere to the 6R (refuse, reduce, reuse, recycle, recover and responsible disposal) principles to effectively manage waste.
- Ensure that the business meets its obligations under Extended Producer Responsibility (EPR) for plastic waste, battery waste and e-waste management regulations.
- Provide training to internal and external stakeholders to raise awareness about best practices in waste management and about the circular economy.
- Establish a comprehensive waste segregation system at source to separate recyclable, hazardous and non-recyclable waste.
- Promote best practices, technologies, and holistic approach on waste management to maximize resource recovery and keep them in circulation.
- Explore innovative strategies and solutions to minimize or limit the quantity and/or toxicity from the waste generated across the business operations.
- Establish metrics and indicators to monitor progress towards waste reduction targets and the implementation of circular economy principles.
- Collaborate with all the relevant stakeholders to solicit input and promote participation in sustainable waste management.

The aforesaid policy shall be made available to all the relevant stakeholders. The policy shall be reviewed periodically for its appropriateness and updated as necessary.
