

At Kutch Copper Limited, we consider water as a crucial shared natural resource and its responsible consumption is one of the key drivers of innovative and sustainable economic prosperity. We recognize the importance of water stewardship in sustainable business practices.

As a responsible organization, we are committed to managing our water resources efficiently and responsibly to ensure environmental sustainability and social well-being.

To achieve this, Kutch Copper shall strive to:

- Comply with all applicable water related applicable laws and regulations.
- Conserve water resources through efficient processes, technology upgrades to minimize water consumption, maximize water recycling and reuse and implement best practices in water management.
- Monitor and assess water usage across all operations to identify opportunities for optimization and reduction.
- Identify water-related business risks and opportunities and develop action plans for mitigating the risks.
- Ensure that wastewater generated through our operations is fully treated and utilized in our operations or other activities to the extent possible.
- Develop and implement water strategies for the business and its value chain through an effective engagement with stakeholders to increase awareness.
- Measure, monitor and performance review performances related to the water stewardship of the organization in accordance with this policy to continuously improve our water management practices.

The aforesaid policy shall be made available to all the relevant stakeholders. The policy shall be reviewed periodically for its appropriateness and updated as necessary.
